From the westernmost edge of Chester County to Center City Philadelphia, from Bucks County's outermost rim to the heart of the Main Line, the Philadelphia area has become a wellspring of exceptional health care. Although some people with very specific needs may have to travel outside of our area to visit a particular physician or surgeon, our backyard is home to some of the country's most revered hospitals, medical facilities and surgery centers, all of them staffed by highly qualified physicians in practically every facet of medicine.

To assist you in your quest for good health, *Suburban Life* and *Philadelphia Life* have partnered with Best Doctors, Inc. to shine a spotlight on the region's leaders in health care. As you'll see on the following pages, Philadelphia and its suburbs have a seemingly infinite supply of exceptional doctors in various disciplines, from aesthetic medicine to urology, and everything in between. In some cases, a doctor may be listed according to the location of his or her affiliated hospital—often in Philadelphia—though the doctor's primary office is a satellite or suburban location.

Of course, no one wants to be in a position where he or she (or a close family member) is in need of help to address a troublesome health issue. Should the need arise, however, paying a visit to one of the men or women listed herein ensures that you will be in good hands.
